

Technical Fact Sheet

Product: **AZO-FREE**

Packaging: 1 set consists of three thirty (30) gram oral Syringes - Four (4) three tube sets per box.

Ingredients: L-Carnitine (500 mg/30 gm), a-Lipoic Acid (750 Gm/30 gm), Thiamine Hydrochloride (1000 mg/30 gm), Magnesium Hydroxide (6000mg/30 gm)

Directions for Use:

Administer one (1) oral syringe on the day before competition; give one (1) syringe on the day of competition; and give the third and final syringe after work, training or competition.

Features:

The most advanced and effective product available to help the working horse utilize its body fat for energy, thus sparing the muscle glycogen. Slower glycogen utilization results in slower buildup of toxic lactic acid, which translates into less fatigue thus producing better performance and less injury. Slowing glycogen loss also helps prevent cramping and tying-up syndrome.
