

# Technical Fact Sheet

- Product:** **G-FORCE**
- Packaging:** 30ml/tube
- Ingredients:**
- Omega-3 Fatty Acids (6.6gm/tube),
    - Extremely helpful in supporting the immune system due to the powerful antioxidant properties within the red and white cells of the blood.
  - L-Glutamine (4.6gm/tube),
    - The most depleted amino acid due to strenuous exercise like racing, eventing and hard training.
  - Gamma Oryzanol (666mg/tube),
    - Known to facilitate the ability of muscle cells to take up amino acids after exercise.
  - Calcium Hydroxy-Methyl-Butyrate (4.6gm/tube).
    - Research has shown a 17% increase in endurance of horses frequently receiving the proper amount of Calcium.

**Directions for Use:**

Give one (1) tube on the day before competition; give one (1) tube on the day of competition; and give the third and final tube after work, training or competition.

**Features:**

This product aids the horse's performance while helping the muscles recover after an event. G-Force also works to combat immunosuppression due to repeated intense exercise, when used regularly.
